NATIONAL MUSEUM OF
INDUSTRIAL HISTORY
Bethlehem, PA

About Us

Looking for a unique and convenient location for your next social gathering, business meeting, client reception or life milestone? The National Museum of Industrial History offers a variety of options to meet your needs.

Set in a historic 110-year old former Bethlehem Steel facility on the vibrant SteelStacks campus in South Bethlehem, NMIH showcases the people, machines, and ideas that shaped our industrial roots and transform our daily lives.

Our Facility

From our conference-ready Education Center equipped with full A/V and telecom capabilities to our expansive lobby, gallery space, second floor, and outdoor plaza, NMIH provides a one-of-a-kind backdrop for your cocktail reception, conference, board meeting, client reception, networking event or team-building activity. Guided tours and hands-on workshops available. Free on-site parking is available.

The Plaza, with a view of the iconic blast furnaces, allows for a 60 person seated dinner or a 100 person cocktail event or even a concert style event utilizing the Air Products Pavilion

The Lobby & First Floor Galleries featuring our historic over-head crane, can host a 100 person seated dinner or 300 person cocktail event.

The Barnette Education Center is fully equipped with A/V equipment, and can accommodate 100 people in a classroom setting, 75 people for a cocktail event and 40 for conference meeting.

The newly finished second floor space has incredible views of the blast furnaces and plant site and can accommodate a 200 person seated event.

Next Level

Our newly renovated second floor space is now available. This fresh space features new hardwood floors, industrial architecture, and breathtaking views of the former steel plant. Guests can dine under the 5-ton crane or peak down into the lobby through the floor hatch in this historic setting.

Contact us to book your fall or winter event in the most unique venue in town!

Group Tours

NMIH has all of the necessities to make your group trip a fun and successful outing. We offer competitive group rates, free parking, and are located in the heart of Bethlehem's SouthSide Arts District.

Experiences & Demos

BAXTER ENGINE & PRINTING PRESS DEMO

See an 1880s era Baxter Boiler Engine, running on compressed air, power our 1920s era Chandler & Price printing press! In this demonstration, visitors learn how power is transferred from a steam engine to a machine. They also get to watch our printer at work, with the opportunity to take home a print hot off the press! Custom prints are available at an additional cost.

30 Minutes.....	\$75
60 Minutes.....	\$150

Take-Home Prices

Small Print.....	\$1
Medium Print.....	\$5
Large Print.....	\$8

CORLISS STEAM ENGINE DEMO

For more than a decade the museum's staff, volunteers, and community partners worked to restore our massive 115-ton Corliss steam engine to working order, 105 years after being built by the Snow Steam Pump Works in Buffalo, N.Y. The engine was used by the York Water Company and pumped eight million gallons of water per day. Have this engine running for your event!

30 minutes.....	\$100
60 minutes.....	\$200

LOCOMOTIVE ENGINEER EXPERIENCE

AVAILABLE APRIL-OCTOBER

Situated in the museum's park area, the 1941 Whitcomb diesel-electric locomotive was used at Bethlehem Steel in the Electric Furnace Melt Shop where it moved trains of scrap metal. Restored by museum volunteers and staff to working condition, the train operates on a little over 100 feet of demonstration track. During this educational experience participants will be able to climb into the cab, learn how the locomotive works, then take the controls under the supervision of museum personnel. The short but memorable runs will let you step back in time, putting you in the same engineer's seat as the steelworkers who helped build the country.

2 Guests at a time.....	6 runs/hr.
1 Hour.....	\$100
2 Hours.....	\$200

TABLETOP METAL MELTING

This is a fascinating, hands-on experience that guests of all ages enjoy. We offer a demonstration that mimics steel-making on a tabletop level, using hot liquid tin. Guests are invited to watch or make their own sand mold that will be filled with metal. After cooling, guests take home their own tin- cast creation, such as holiday ornaments. Custom molds are available at additional cost.

1 Hour.....	\$50
2 Hours.....	\$100
